

# PROTOTYPE/PRODUCTION DEVELOPMENT PROCESS FLOW

Meeting to understand the concepts and commercial requirements and any other areas of major importance such as timescales, aesthetics, patents etc.

If you decide Westcut are a good fit for your requirements, we will look at the range of manufacturing processes we offer to give you the best most cost effective manufacturing solution and provide a quotation.

If your project is of a large nature with multiple components, Westcut will work with you to create a robust project plan with measurable milestones.

With the range of processes Westcut has on offer, we are able to move to full production of your requirements, once the development work has been approved.

We have a full MRP system in place and are certified to BSENISO 9001:2008, so you can rest assured that all aspects of your work will be managed professionally.
